Fad

the **fore** ami **the** color of the apex and upper mar-
gin **of** the Expanse, 2.25-2.75 inches.
have ban partially described by Henry
and worked out by Dr. Dyar, for whose **de-**
scription the may consult the "Canadian Entomologist/'
vol. p. 172. The food-plant of the caterpillar is *Populus,*
and the choke-cherry *(Prunns demissa).*
the figured in our plates there is a species in
by Strecker, and subsequently m>* by
Is generally larger and much darker than *B. di-*
it otherwise closely approximates.

THE BUTTERFLIES' FAD

**I *me* night in my travels
To stray into Butterfly Vale,

Where ray wondering eyes beheld butterflies
wfri wide as a sail.
Ticy lived in such houses of grandeur,
Ticir clays were successions of joys,
the very fast fad these butterflies had
W s t@H$d$tm$ of "b>oys.*

"There were boys of all sizes and ages
np m tMr m&Us, When I said
Twas a terrible sight to see boys in that plight,
I answered ; *Qi, mM, they are dead.*

McM them dint, tot wWtbem

— t very nke way:

Jest look at this fdkw— his hair is so vellow,
his eyes such a beautiful gray.

** *Ttea there is a droll little darky,
As as the clay at our feet;
He sets off that blond that is pinned just beyond
In a way most artistic and neat.
let rae show you the latest, —
A really select,
A boy with a lead fiat is carroty-red

btr him out of each class;
W« Mn a treasure to stody at leisure
